AutoCAD history AutoCAD has evolved from two main predecessors: PlaCAD and MicroStation. PlaCAD The first CAD system used in the auto industry was the CADPS1, named "PlaCAD" after its primary developer. After development had

ceased, PlaCAD was bought by AutoDesk, who supported the PlaCAD name. PlaCAD was an AutoCAD-like product that was intended to develop a more complete building information modeling product than AutoCAD. PlaCAD is now one of AutoDesk's discontinued products. MicroStation The second CAD system used in the auto industry was the MicroStation from PTC. One of the developers of this product, Gordon Minshall, co-founded ArcInfo for his company, Environmental Systems Research Institute, Inc., later renamed to Environmental Systems Research, Inc. (ESRI). A number of technical and business problems with MicroStation resulted in its discontinuation, and it was a1d647c40b

We affirm. On December 20, 1998, an Arlington police officer tried to stop appellant's car because it was suspected of being stolen. Appellant fled from the officer, and when the officer caught her a few blocks away, appellant hit him with her car, causing him to lose a contact lens. At the time, appellant was on parole
